FRIDAY, OCTOBER 31, 1913.

SOUTH BRUCE—CHATEAUGUAY.

The result in South Bruce is, of course, a disappointment to the Chateauguay as that is the party in Opposition. But the defeat of a government candidate in a constituency lately held by the government means much more than a defeat of an opposition candidate in a constituency hitherto held by that party. There is, therefore, and admittedly, a large percentage of advantage in favor of the candidate of the government in power at a bye-election. It is not remarkable where this advantage is sufficient to overcome a narrow Liberal majority as in the case of Chateauguay. But it is remarkable when even that advantage is sufficient to hold the normal government majority as in the case of South Bruce. The returns indicate that the Liberal was elected at the bye-election yesterday by a margin so large as that which defeated the Liberal at the late general election. Comparing South Bruce with Chateauguay, in the latter the Liberal candidate was an outsider and the "home boy" argument was worked against him with deadly effect. In South Bruce the Conservative candidate was the son of a former popular Conservative member, and his name alone was good for scores of votes.

It is no process of reasoning that the result in Bruce is better otherwise than as a distinct slap at the Government or its policy, or both. Trade and defence were the issues placed by the Liberals before the electors of Chateauguay. Trade and defence were the issues which they placed before the electors of South Bruce. Chateauguay the Government did not take up the challenge. Their campaign policy was a still hunt directed against the Liberal candidate personally. Bourassa's opponents assisting with their whippers against the Laurier name such as won the infamous Drummond-Arthabaska bye-election. But in South Bruce the Government did not issue the Opposition policy regarding trade and defence. The new solicitor general is reported to have promised the people of Wilketton to revive a better trade industry there by imposing a duty on twice as a bribe for their support and the old flag was worked overtime in an ultra loyal constituency. It is the efforts made by the Government to hold Bruce that give the greatest importance to their defeat.

It may be, however, that the result in Bruce was because the Minister of Elections was unable to assist, having received an urgent call to Montreal in connection with the protest in the Macdonald election held a year ago, which like the reciprocity issue ultimately refuse to stay dead.

EXPLANATORY.

Mr. Henry J. Roche, secretary of the Civic Government League, writes the Bulletin explaining that his organization does not admit that Edmonton could get good city government under its present system, however capable and upright might be the men elected to the council.

The correction is published most willingly. The Bulletin has no desire in the least to misrepresent the aims of so worthy a group of citizens as are included in the membership of the league. It understood that the league

accepted the ordinary business principle that the success of any enterprise depends upon the type of men at the head of it, and that the elective commissioner system was favored because it was thought likely to put the best men obtainable in charge of civic affairs.

Mr. Roche's letter makes plain the fundamental error in this conception of the league's policy and object. It is not, he says, admitted that the best men could manage affairs well under the present system. What is sought is not a change of system with a view to getting better men, but with a view only to effecting the change of method by which the controllers of civic affairs are selected.

THE VIRTUE IS VOLUNTARY.

Chief of Police Carpenter says Edmonton is the most law-abiding city he is acquainted with. The compliment is to the self-restraining habits of the citizens, not the criminal-catching talent of the police department.

TIME TO GET OUT.

The Austrian budget shows a deficit for the coming year of thirty million dollars. This perhaps explains why the Austrian government is showing so much energy just now in trying to stop emigration. The tax-payers are needed at home. Perhaps the proposal shows also why so many of them are anxious to get away.

FELLOW SUFFERERS.

The assessed value of real estate in Montreal is \$618,169,000, an increase for the year of nearly \$107,000,000. The amount of the tax has doubled since 1910, and has trebled since 1906. The Western chap whose tax bill makes him think he has been getting richer faster than the convenient way take comfort in knowing that even staid Montrealeers are feeling the pinch of opulence.

THE PROFESSOR'S CHANCE.

Professor Alexander writes the Bulletin under the mistaken impression that the paper has been trying to be facetious at the expense of the new street numbering system, and says ironically "I am not a constructive critic, and approves the new system on the ground that he can find no other so comprehensive."

That the system is comprehensive there can be no manner of doubt. It comprehends several square miles of territory which has been known to the city authorities, and by the simple process of continuation could be made to comprehend all that portion of the continent lying west of the imaginary First Street line, from the Polar Sea to the Gulf of California. Upon the score of comprehensiveness there is no room for controversy.

The impression made in the plain and simple language the impression made upon the mind of one of the great non-professional majority as he surveyed the new placed on one of the street cars, this paper is accused of "ridiculing" the new numbering system. Not at all. The Bulletin merely stated what the system looks like when applied to the designation of the street-car routes. If it is to do that makes the system seem ridiculous, the fault is surely in the system, and not in the beholder, nor in the statement of the fact.

Constructive criticism is of course the most valuable kind of criticism. Suppose the professor try his hand at it. Given a non-professional individual who is not a professor of mathematics, gazing in wonderment at the mystic combination on the front of a street car. Required to tell him whether that car would take him home if he got aboard. Frankly, the Bulletin can't do it. Suppose the professor take him in hand.

U. S. SUPREME COURT MAY HAVE DECIDED IMPEACHMENT CASE.

New York, Oct. 30.—A suit to bring the impeachment of William Sulzer before the supreme court of the United States was started today in the U. S. district court here by citizens' committee organized by Wm. S. Moore, an employee of the New York World.

Remark on the Side

A South Alberta paper announces that some misguided crooks were in bloom last week.

A laborer in Philadelphia has made the discovery that it is dangerous to smoke a pipe while carrying sticks of dynamite under his arm. There was, however, not enough of him left to take any interest in the matter.

Russian ministers it appears, have been so much hurt by an insult offered the cabinet by the late Duma that they have refused to attend the present session of that august body. The Duma must be rather elated at the thought that it has at last the power to hurt somebody's feelings.

Following the example of the Italian judiciary, the policemen of London have decided to form a trade union. If the movement should prove successful, perhaps Tommy Atkins himself will be struck with the idea and certainly an international "Sappers' Union" would be apt to make Kaiser and Caisers and armaments ring at up and rub their eyes.

"Johnny," said the farmer to his son, after supper when you have finished cutting the wood and got through milking, and looked after the horses, you might say that load of grain I'm taking to town tomorrow I am going to the meeting in the school house tonight. And at the meeting Johnny's father led the discussion on "How to Keep the Boys on the Farm."

Correspondence

SAYS IT IS THE SYSTEM—NOT THE MEN—AT FAULT

Editor Bulletin:—In the morning edition of the Bulletin, October 29, an editorial appeared under the caption "Not To Be Feared," which states that those who advocate a change in the system of Edmonton's city government, admit that the present system would be a good one if the city government of Edmonton could govern it in the right men got into the city council.

I, for one, do not agree with those who advance this idea and firmly believe that the system which is at fault in Edmonton, not the men in the council.

An elective commission form of government has solved civic problems in many other cities and I am thoroughly familiar with the city government of Des Moines, Iowa, which is the system which is at fault in Edmonton, not the men in the council.

Being acquainted with the work and the records of Edmonton's city government, I have no hesitancy in asserting that any of the men now holding office are amply qualified to act as commissioners.

MERCURY DROPPED TO 14 BELOW ZERO AT PEACE RIVER

Winter Has Set in at the Crossing According to Telegraphic Report

GROUARD AND SAWRIDGE REPORT COLD WEATHER

Ice Running in Athabasca, and River May Be Closed in Few Days

(From Evening Edition)

From messages received by the Bulletin yesterday from various points in the Peace River country, it can be safely said that winter has set in at Peace River Crossing yesterday as the mercury registered 14 degrees below zero. There is a heavy fall of snow, and the river has a thin coating of ice.

At Sawridge, which is situated at the east end of Lesser Slave lake, there was some snow yesterday morning. There is about six inches of snow, and the message from that point states that drifts are as deep as snow has come to stay. The weather is clear and cold.

The report from Grouard, at the west end of the lake, states that there is about an inch of ice there, and a light snow.

The correspondent at Athabasca reports that there is thin broken ice running in the river. The water is low. With two or three nights like last night the river will be closed up. There is about two inches of snow at Athabasca.

Still Searching for Bodies.

Dawson, Nov. 1, Oct. 30.—About thirty more bodies were found in the mines of the Big Canadian camp this morning. In the last 24 hours four bodies have been recovered from Mine No. 2, worked by an expedition last Wednesday. The thirty-eight bodies still in the mine are buried under a heavy fall of debris and the work of removal from now on will be slow.

EXPERT TESTIMONY IN MURDER TRIAL DIFFERS

Physicians Agree on Only Two Points in Blood Rhine Murder Trial in Russia—Hold That at Least Two Persons Committed Crime, and Had No Knowledge of Anatomy.

Kiev, Oct. 29.—The expert testimony of physicians occupied most of the day at the trial of Michael Holmboe charged with having killed the boy Sabinsky. The experts, who were divided into two groups, were charged with two persons were implicated in the actual killing of the boy but were divided on the question as to whether the prime object of the murder was the object of so much blood as possible and the infliction of torture or not. The imperial court surgeon, Dr. Pavlov, contended the theory of blood-staining, but admitted that the experts had little on which to base their theories because of the incompetent manner in which the two post-mortem examinations had been made, and the incomplete reports submitted relative to them.

Dr. Tutunoff, of Kiev University, testified that at least two persons had killed the boy. He was divided into two groups, the experts were divided on all points except as to the number of persons concerned in the crime, which they all agreed was two, and the theory that the murderers had no knowledge of anatomy.

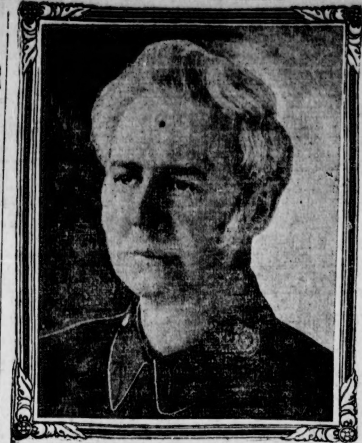

During the course of his testimony Dr. Pavlov said that the character of the wounds was not indicative of the blood-staining and torture theory.

MRS. EATON DID NOT MURDER HER HUSBAND

Sensational Trial at Plymouth, Mass., Ends in Acquittal of Accused Woman.

Plymouth, Mass., Oct. 30.—Mrs. Jennie May Eaton was acquitted on charges of the murder of her husband, Rear Admiral Joseph G. Eaton, 519 a.m. today. The jury, after a trial of six weeks, held that there was no evidence that she had killed her husband, as the night nurse of one of a very 200 persons at the time of the murder. Mrs. Eaton awaited the verdict with composure and smiled when she heard the foreman pronounce her "Not guilty."

11 ALL OVERSEAS DOMINIONS BUILD SHIPS FOR THE EMPIRE WITHOUT VOICE IN ITS AFFAIRS

New Zealand's High Commissioner Frankly Declares Great Britain Should Not Interfere With Naval Policy of His Country—Can Be No True Imperial Fleet Without Imperial Council.

Canadian Associated Press.

London, Oct. 30.—Speaking at the "Lancers" ball at the Ritz, Mr. Thomas Mackenzie, high commissioner for New Zealand, said his opinion was that until we could first weld together the various portions of the Empire in some common council, we should never build together an imperial fleet.

"I ask," he proceeded, "is it right that the overseas dominions, without an adequate voice in imperial affairs, are to be required to contribute to the building of a fleet which is to be controlled by a minister that may be elected by some local body with which we have no connection?"

"Even though there be no need for such a fleet, it is absolutely necessary that there be no undue delay. We have left we ought not to rely entirely upon the Mother Country. Attempts are, however, being made to defeat the work we have in hand and especially at that being done in this country."

"We have no right to interfere in your internal administration, and I maintain that you have no right to interfere with the work we are carrying out. The desire on the part of some who are endeavoring to defeat our work is not from an interest they have in the Empire, but from a desire to have a say in the Empire."

ROGERS HASTENS TO HELP MORRISON

Minister of Election to Attempt to Prevent Unseating of Member for Macdonald

CASE TO COME UP IN COURTS NEXT MONTH

General Impression in Conservative Circles is That Protest Will Be Successful

Ottawa, Oct. 30.—Hon. Robt. Rogers, minister of public works, left for Winnipeg Tuesday night on important business. The minister's sudden departure for the west was the result of a long and earnest conversation with Sir Edmund Roblin early in the evening in the Chateau Laurier. That the business is urgent may be gathered from the fact that Rogers left while a by-election is pending in South Bruce.

It is stated on good authority here that Mr. Rogers has gone out in connection with the protest against Mr. Morrison, M.P. for Macdonald, the hearing of which before the courts comes up early next month.

Western Conservative members and the Manitoba premier have brought charges against the minister in connection with the protest. It is the general impression seems to be that the protest will be successful. It is the purpose of the protest to bring Mr. Rogers' visit to the west to the attention of the public and to bring about a change in the government. FOURTH YEAR RUN OF SALMON WILL BE GOOD

Blowing Work of C. N. R. Along Fraser River Canyon May Not Halt Effect of Prevailing Salmon Trade Along River to Span.

Ottawa, Oct. 29.—According to official of the department of marine and fisheries the reports that have recently appeared in the press to the effect that nothing was to be expected of the salmon run this year have been prevented from reaching their spawning beds in the Fraser river to the extent of decreasing the big fourth year run to the proportion of an off year were somewhat exaggerated. In building its road along the side of the river east of Killoe, the Canadian Northern railway will allow the regular quantities of salmon to pass up the river. THE PRODUCE MARKET.

Produce market for the farm was rather scarce on the market, and the prices quoted below for some things—butter and eggs, for example—were probably much lower than would be obtained for the "strictly fresh" variety:

Live, fresh quarter 30
Butter, hind quarter 12
Live chickens, each 40 to 50
Dressed hens, per lb. 12
Pork, per lb. 10 to 12
Mutton, per lb. 10 to 12
Butter, per lb. 20 to 25
Eggs, per dozen 20 to 25
Potatoes, per bushel 35 to 40
Clover, per ton 45 to 50
Timothy, per ton 45 to 50

IN THE POLICE COURT.
